Farmstream 360 4G Camera Setup

STEP 1

Check your box for:

1 x 4G 360 Degree Camera
1 x Built in eSIM
1 x Pre-installed SD Storage Card
3 x Antenna
1 x Standard 3-pin plug
1 x 5m DC Power extension cable
1 x Speaker
1 x Screw pack

Our Farmstream Cameras now come with an eSIM and inbuilt storage. If you are using your own SIM or wanting to upgrade your storage we have included instructions at the end of this manual.

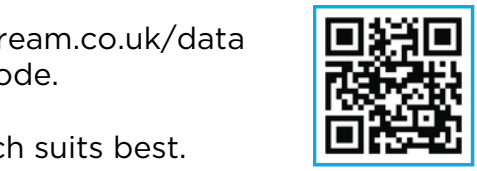

STEP 2

SIM card activation:

A. Visit www.farmstream.co.uk/data or scan this QR code.

B. Select a plan which suits best.

C. Fill in the required payment details and ensure you correctly enter the 4 letter activation code. You will find your activation code on the model sticker on the side of your camera.

Digital SIM activation code found on side of camera OR on the box

STEP 3

Antenna attachment:

A. Carefully attach the three antennas into place, making sure they are all tightly screwed into place.

STEP 4

Power on your new camera:

A. There are four cables coming out of the back of the camera (as pictured). Connect the power cable to the power lead. This will be the 3-pin plug if powering the camera via mains or this will be a 12V battery connection cable if powering via a 12V battery.

B. Hold the camera by the mount and plug into power. The camera will rotate during the start-up process and to prevent damage, it is best to hold the camera by the mount.

C. Connect the black speaker to the audio out connector lead coming out of the camera.

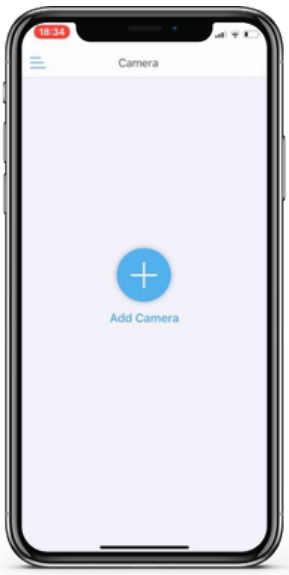

STEP 5

Connecting your camera to the CamHiPro app:

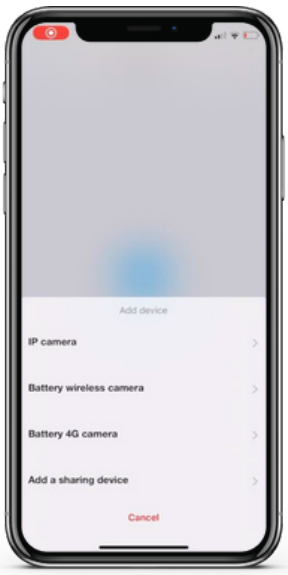

A. Download CamHiPro from the App/Google Play store

B. Once downloaded, open CamHiPro and grant it full permissions.

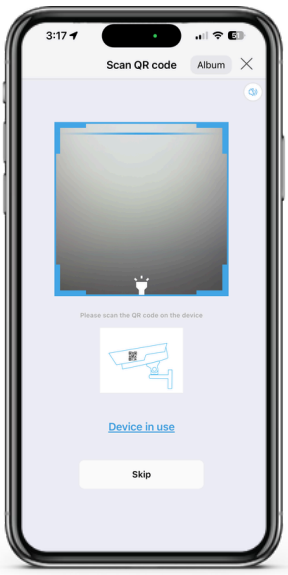

C. Follow the steps below to connect the camera to the app

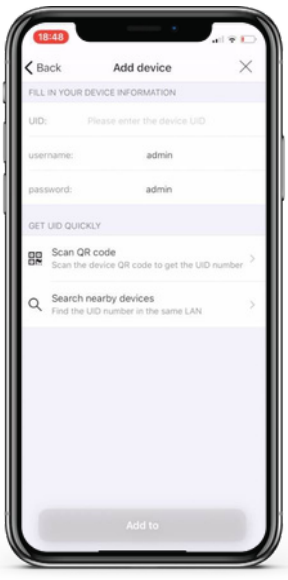

1. Select 'Add Camera'

2. Select **'IP Camera'**

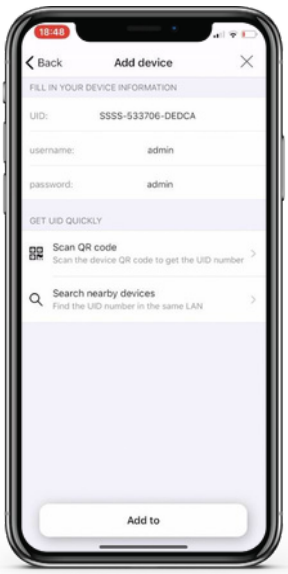

3. Select 'Device in Use' **Do not scan the QR code yet**

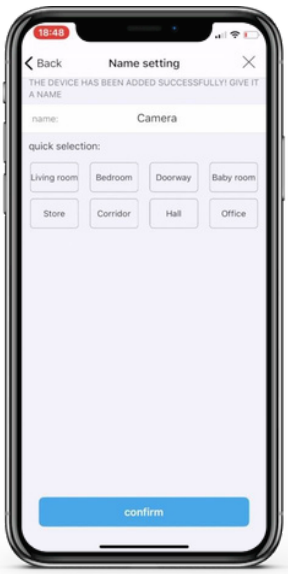

4. Select 'Scan QR code' and scan the QR code on the side of the camera

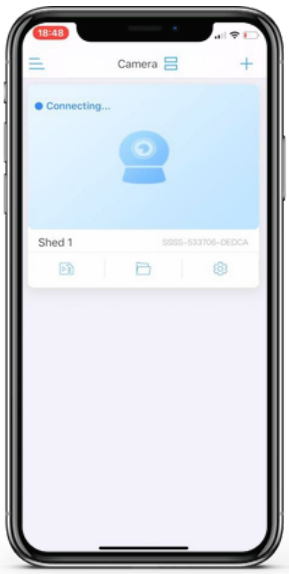

©Farmstream LTD 2026

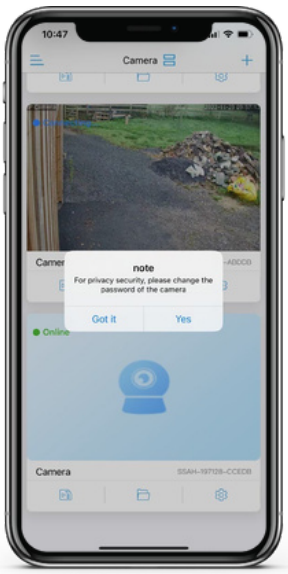

5. Select ‘Add to’

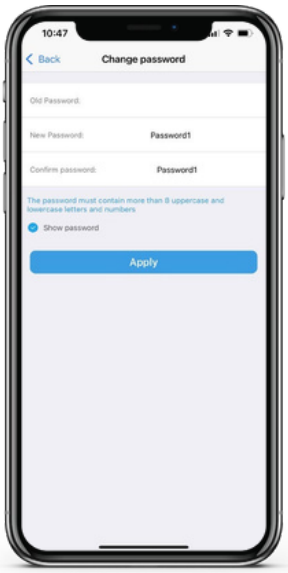

6. Name your camera and select ‘confirm’

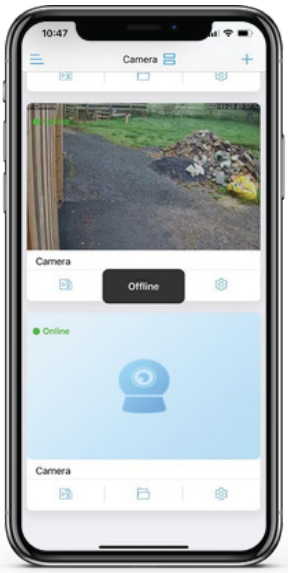

7. Wait for 10-15 seconds for your camera to connect

8. You will be prompted to set a password. Select ‘Yes'

9. The Factory Set password is ‘admin’. Set a new secure password.

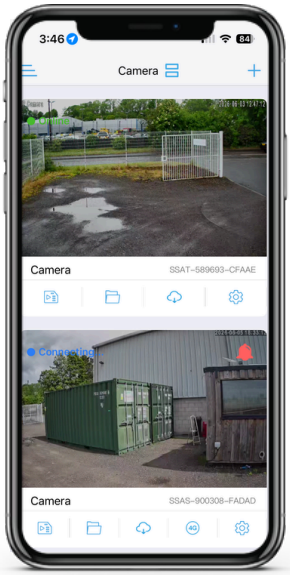

10. Tap on your camera to bring it online, and tap again to view

STEP 6

Setting the correct time:

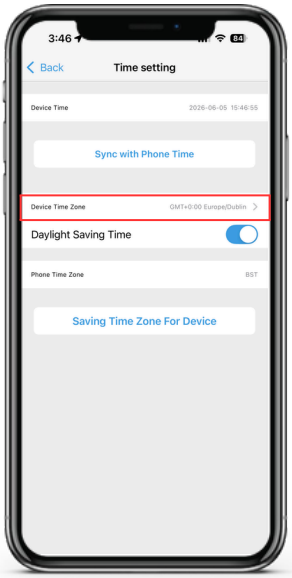

The correct time must be set otherwise the app may not alarm correctly and the recordings will have the wrong time stamp. The app will prompt you to change the time, this needs to be done manually for the change to be effective.

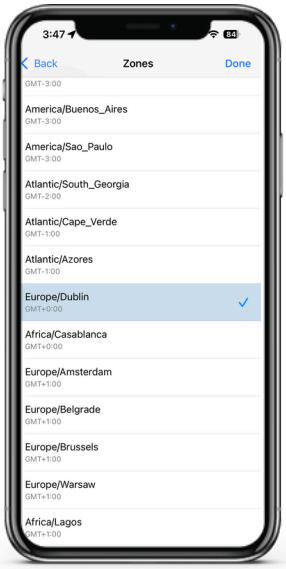

1. Open the settings by selecting the Cog

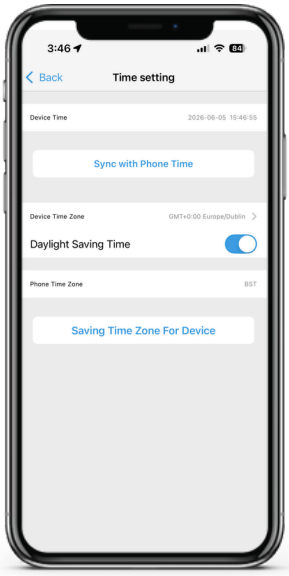

2. Scroll through the settings until you see “Time Setting”

3. Select “Device Time Zone”

4. Scroll through the time zones until you find “Europe/Dublin”

5. Toggle the “Daylight Saving Time” to **on** and select “Saving Time Zone for Device” the Camera will then restart

STEP 7

Getting to know your camera:

A. You can now view and control your Camera in the app. For further guidance on using the app please see our CamHiPro guide

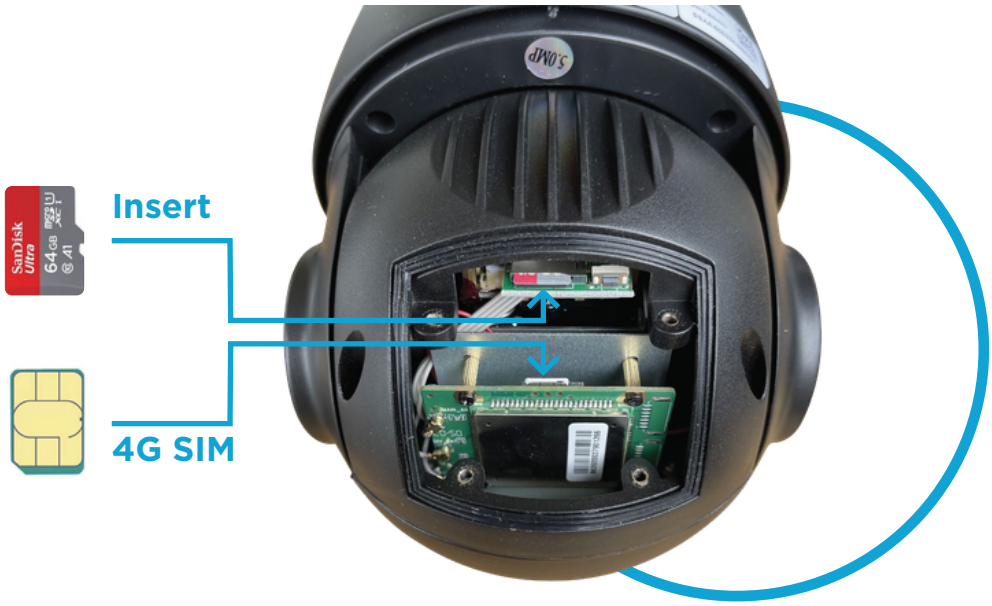

B. The camera defaults to SD (Standard definition) when installed, tap SD to change to HD (High definition) for a higher quality image.

INSTALLING YOUR OWN SIM CARD OR UPGRADING STORAGE?

Inserting SIM card & SD card:

A. Use a screwdriver to carefully remove the back access panel.
B. Insert the SIM card. When inserted correctly, each of these will gently click into place.
C. Replace the back access panel and take care to ensure the black rubber seal is totally straight and the access panel is securely fastened for moisture resistance.

Note: Our cameras are unlocked and can be used with any SIM card provider. For alternative providers, the camera cannot always automatically retrieve the correct network settings. It may then require the APN settings to be manually updated. There is a guide on how to do this here https://www.farmstream.co.uk/pages/apn-settings

©Farmstream LTD 2026

Your 4G 360 Degree Camera is now setup, and you'll be able to view footage wherever you are using your mobile phone. Feel free to unplug your camera and mount it where you want to use it before reconnecting to power.

Any questions regarding setup?
