Farmstream 4G Static 5MP Camera Setup

STEP 1

Check your box for:

1 x 4G Static Camera
2 x Antennas
1 x 3-pin plug adapter
1 x Screw pack (not pictured)
1 x Farmstream Streaming SIM (not pictured)

STEP 2

SIM card activation:

A. Visit www.farmstream.co.uk/data or scan this QR code.

B. Select a plan which suits best.

C. Fill in the required payment details and ensure you correctly enter the 20 digits on your new SIM card to activate.

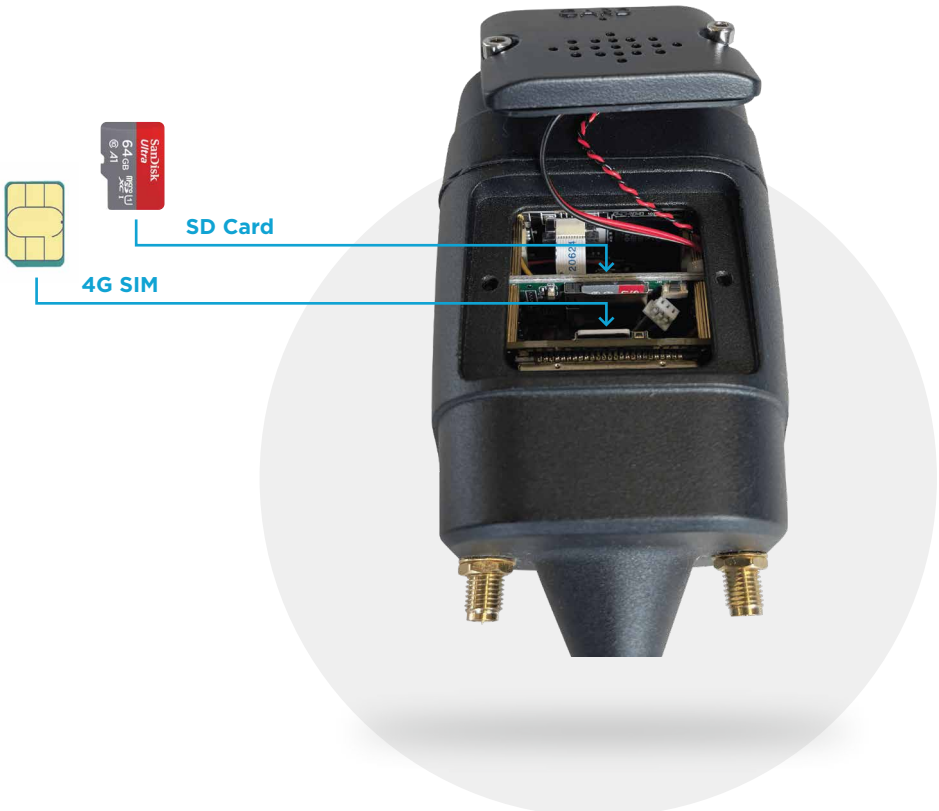

Note: Our cameras are unlocked and can be used with any SIM card provider. For alternative providers, such as Vodafone, the camera cannot always automatically retrieve the correct network settings. It may then require the APN settings to be manually updated. This is a straightforward process, and we have specific instructions on how to do this available on the setup page of our website.

STEP 3

Inserting SIM card & SD card (SD card optional):

A. Use the Allen key provided to carefully remove the back access panel.
B. Insert the SIM card and SD card (if using) as shown below. When inserted correctly, each of these will gently click into place.
C. Replace the back access panel.

STEP 4

Antenna attachment:

A. Carefully screw the two antennas into place, making sure they are tightly screwed into place.

STEP 5

Power on your new camera:

A. There are four cables coming out the back of the camera (as below). Connect the power cable to the power lead coming out the back of the camera. This will be the 3-pin plug adapter if powering the camera via mains or this will be a 12V battery connection cable if powering the camera via a 12V battery.

STEP 6

Connecting your camera to the CamHiPro app:

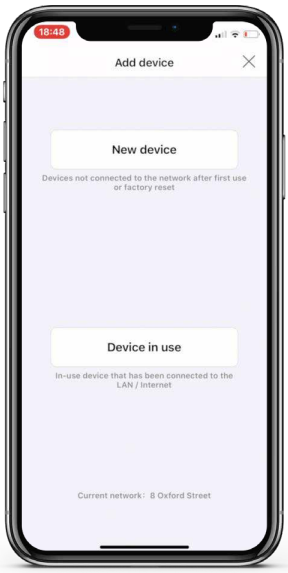

A. Use your mobile phone to access the App / Google Play store and download a free app called 'CamHiPro'.
B. Once downloaded, open CamHipro and give it full permissions.
C. The following steps can be used to connect your 4G Static to the CamHiPro app:

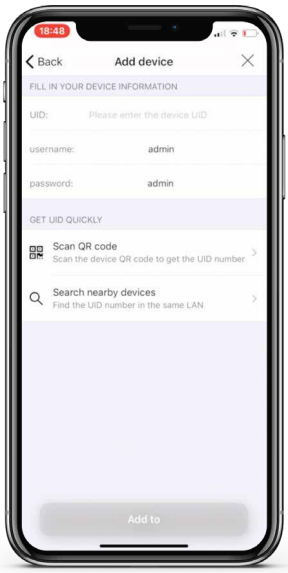

1. Select **'Add Camera'**

2. Select **'IP Camera'**

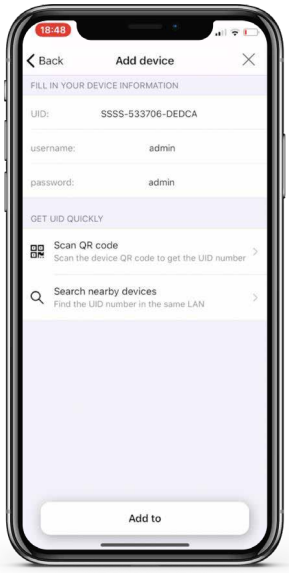

3. Select **'Device in Use'**

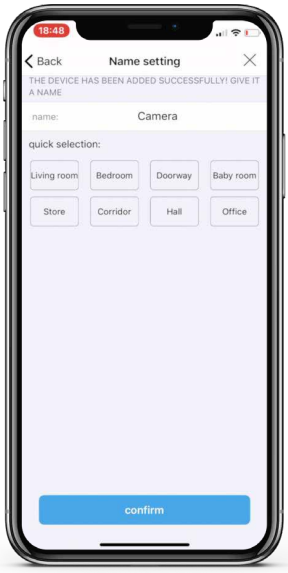

4. Select **'Scan QR code'** and scan the QR code on the side of the camera

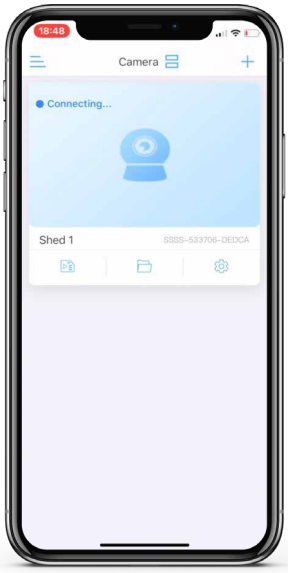

Note: Ensure you scan the QR code on your camera displayed next to your UID code (Your UID code will be a 15-digit code. Example: SSAA-534834-ACABA)

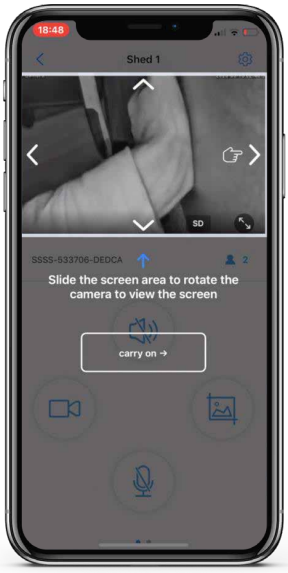

5. Select **'Add to'**

6. Name your camera and select **'confirm'**

7. Tap on your camera to bring it online, and tap again to view

8. Follow the tutorial

©Farmstream LTD 2023

Your 4G Static Camera is now setup, and you'll be able to view footage wherever you are using your mobile phone. Feel free to unplug your camera and mount it where you want to use it before reconnecting to power.

Any questions regarding setup? Drop us an email at **support@farmstream.co.uk**, including your order number and a brief description of the problem so we can get the best person to help figure out what is going wrong.

We also have a troubleshooting section on our website: https://www.farmstream.co.uk/troubleshooting
